

This is the Assembly Sheet for posters.

Turn this off with the Tools->Options menu and then click the Poster tab.

Instructions:

- 1- Lay down each sheet of paper in the order they were printed from left to right and then top to bottom (as you would read).
Use the poster numbers in the top left corner to help assemble the poster. A * at the end indicates the last page in the row.
- 2- Trim off the nonprintable area from the edge of the paper.
Use the cut marks as a guide.
- 3- As you assemble the poster, line up the edges of the paper.
